EduTrack School & College Management System

Complete Features, Tabs, and Functionalities List

1. Introduction & Overview

This document presents the complete feature audit, navigation structure, and custom components from the Salesforce EduTrack 2GP Managed Package. It serves as the source of truth for replication in the independent SaaS application.

2. Application Shell Navigation & Tabs

- Dashboard:
Central executive hub presenting student/teacher counts, collection trends, timetable previews, monthly expense charts, and unresolved complaints.

- Academic Years:
Configure sessions (e.g. 2025-2026). Enforces Institution business rules (maximum of 2 active concurrent years).

- Subjects:
Institutional courses repository (e.g. English, Maths, Science, Social, Hindi, Telugu, Environmental Science).

- Classes & Sections:
Define grades (e.g. Grade 10) and class-section junctions mapping strength limits and advisors.

- Teacher Skill & Assignments:
Subject competency registry and mapping records linking teachers to classes and subjects under weekly constraints.

- Timetable & Schedules:
Weekly master planning scheduling period timing slots, subjects, instructors, topic notes, and substitute teachers.

- Attendance System:
Roster registers tracking daily attendance logs (Present, Absent, Late) and statistical reports.

- Exams & Grading Sheets:
Term examinations, subject weighting, spreadsheet marks entry, GPA calculations, and class rankings.

- Fees Catalog & Invoices:
Products fee configurator, transaction invoices ledger, discount controls, UPI payment setups, and printable receipts.

- Expenses Ledger:
Operational outflows logs, categorization directories, and transaction cost charts.

- Complaints (Cases):
Student feedback, dispute cases, case category logging, and resolution tracking.

- School Staff Profile:
Personnel directories tracking credentials, salaries, allowances, and qualifications.

3. Salesforce Objects Inventory

The backend records database contains 29 custom and standard objects including:
- School_Setup__c: Hierarchy settings for school branding, logos, bank items, and UPI QR links.
- Account: Differentiates student, parent, and teacher roles via Record Types.
- Attendance_Session__c & Attendance__c: Log sheets and statuses per student.
- Exam__c: Normalized subject marks registers supporting standard and JSON custom mark storage.
- Opportunity & OpportunityLineItem: Standard fee scheduling structures.
- Invoice__c & Invoice_Item__c: Printable accounts billing receivables.
- Period_Timing__c & Period__c: Bell slot timings and scheduling layouts.

- Expense__c: School operational expenditures.

4. Front-End LWC Interfaces (27 Components)

Replicated user workflows include custom interface controllers:
- admissionManager: Multi-step student registration form.
- bulkStudentImport: File-based CSV uploader for fast registrations.
- payTheBill: Payees invoice selector and UPI scan-to-pay checkouts.
- studentPromotion: wizard promoting students across terms.
- attendance: Roster grids for check-in status logs.
- enterMarks: Marks spreadsheet layout.
- eduProDashboard: Responsive tiles and metrics analytics widgets.
